HOW DOES THIS WORK?

When you start a points award program with Awards Network, we'll design a customized award website and promotional materials to help you communicate your program's goals to your participants.

1. Decide your program goals / activities that you want employees to achieve.

2. Assign points to each goal based on importance.

3. Award points to employees as targeted goals / activities are completed.

4. Employees can spend their points as they are earned or save for higher level awards.
